PROFESSIONAL SUMMARY

Software Engineer with experience building full-stack and front-end web applications using JavaScript, React, Python, Flask, HTML, CSS, and SQL. Skilled in developing responsive user interfaces, RESTful APIs, authentication systems, and database-driven applications. Strong problem-solving and communication skills with experience taking applications from development through deployment. Passionate about building reliable, user-focused software and continuously expanding technical expertise.

PROJECTS

Driftr- Full-Stack Weather & Activity Discovery App

Link: [amercado1199-hub/Driftr](#)

React | Python | Flask | SQLAlchemy | REST APIs

- Developing a full-stack application that uses location and weather information to help users discover activities based on current conditions.
- Built REST API endpoints, database models, user authentication, and integrations with external data services.
- Implemented application testing and structured the backend using reusable routes, services, and API clients.

HomeTrack Academy- Homeschool Management Platform

Link: <https://github.com/amercado1199-hub/HomeTrack-Academy>

React | Python | Flask | SQLAlchemy

- Built a full-stack homeschool management application for managing students, subjects, lessons, attendance, and field trips.
- Developed authenticated user sessions and database relationships to keep individual user and student information organized.
- Created protected frontend pages and connected React components to Flask REST API endpoints.

SKILLS

Languages: JavaScript, Python, HTML, CSS, SQL

Frontend: React, React Router, Vite

Backend: Flask, SQLAlchemy, REST APIs

Database: SQLite

Tools: Git, GitHub, VS Code, Postman, npm, Docker

Testing: Vitest, React Testing Library

EDUCATION

Flatiron School- Software Engineering Program

Angels of Mercy- Certified Nursing Assistant

Time Tracking & Pay Calculator

Link: <https://github.com/amercado1199-hub/timesheet-pay-lab>

JavaScript | React

- Built an application for tracking work hours and calculating estimated earnings.
- Created an interactive interface that processes user-entered work data and displays calculated results.

EXPERIENCE

ARCE Massage — Freelance Web Developer — March 2026 - Current

- Designed and developed a responsive website for an independent massage therapy business.
- Built reusable frontend components and mobile-responsive layouts focused on usability and client conversion.
- Managed the project from initial design and development through testing and deployment

Clipboard — Nursing Assistant — September 2020 - January 2026

- Worked collaboratively with healthcare teams in fast-paced environments while maintaining accuracy, organization, and attention to detail.
- Provided Patient Care.
